Likitha Shivananjegowda
Data Analyst | Customer & Product Analytics | SQL, Python, Tableau & AI
Hildburghauser str 26a 12279,Berlin|Born:21/06/1998|+4915567647539
likitharama2118@gmail.com | LinkedIn | **Portfolio**

Currently residing in Berlin on a **Chancenkarte (Opportunity Card)**. Fully authorized for immediate full-time employment and seamless EU Blue Card transition

TechnicalSkills

Data & AI: Python | SQL | Pandas | NumPy | Scikit-learn | LLMs & Generative AI | ChatGPT | Cursor | Azure Copilot
Visualization & Communication: Tableau | Power BI | Excel | KPI Analysis | Data Visualization | Analytical Reporting | Technical Documentation
Customer & Product: Customer Journey Analysis | KPI Analysis | Trend Analysis | Behavioral Patterns | Business Insights | Data Quality
Technology Platforms: Azure | Azure ML Studio | Snowflake | Apache Airflow | KNIME | Docker | Kubernetes | Terraform | Jenkins | Git

Work Experience

03/2026-Present

Analytics Engineer (Volunteer)
Open Food Facts, Remote
Project: Open Food Facts is an open-source, crowdsourced food product database standardizing nutrition and ingredient data across millions of global entries.

- Designed a modular dbt-based data model to structure product contribution trends, category performance KPIs and regional patterns, creating consistent analytical inputs across a large open-source global dataset.
- Investigated data-integrity issues in incomplete product records, identifying improper null handling and implementing targeted validation tests to strengthen data quality and reliability.
- Built automated ELT workflows using Apache Airflow, Snowflake and GitHub Actions, improving the consistency and accessibility of structured information for downstream analysis.
- Applied analytical and data-quality methods to transform complex, heterogeneous product information into reusable datasets for trend and performance analysis.

Technologies used: SQL | Snowflake | Apache airflow | Python | GitHub Actions

09/2024–02/2026

Data Analyst- Platform and Insights
Decathlon Digital, Dublin, Ireland (Hybrid)
Project: ERP Data Quality & KPI Automation—France-based multinational sports retailer with 2,000+ stores in 70+ countries.

- Investigated ERP data inconsistencies across multiple business systems, developing SQL validation rules and Python-based hypothesis tests that established measurable data quality baselines for 5 teams.
- Structured and analyzed KPI trends using Python and Pandas, comparing manual and automated reporting approaches and reducing reporting time by 40%.
- Integrated information from CRM, SCM, financial and HR systems to structure cross-functional datasets for customer-journey and performance analysis, improving forecasting accuracy by 12%.
- Developed Tableau dashboards to translate complex sales and inventory datasets into concise visual insights, reducing the analysis period by 50% through comparative metric analysis.
- Applied statistical and hypothesis-testing approaches to large datasets to identify patterns across customer-journey segments and support evidence-based analysis.
- Used AI-enabled tools including Gemini and Azure Copilot alongside Python, SQL and analytics platforms to improve analytical workflows and information processing.
- Achievements: Best Creative and Logical Thinker – Decathlon Sports Ireland

Technologies used: SciPy | Pandas | Power Query | Tableau | Excel | Power BI |Gemini | Azure Copilot | SQL | Snowflake | Apache airflow

10/2023 – 09/2024 Data & Infrastructure Engineer

Vigameq Consultancy Services, Bangalore, India (Remote from Ireland)

Project: Vigameq Consultancy Services—an India-based technology startup providing data and cloud solutions to around 50 different clients.

- Supported data and cloud initiatives within a technology startup serving approximately 50 clients, working across analytics, cloud infrastructure and automation environments.
- Investigated data-quality and pipeline issues and automated validation workflows using SQL, Pytest, Jenkins and Terraform, reducing data QA time by 25%.
- Evaluated analytics and recommendation-model workflows using statistical testing approaches, supporting more reliable evidence-based analysis.
- Deployed ML workflows through Azure ML Studio and translated model outputs into Power BI visualizations, enabling stakeholders to identify sales and inventory trends 30% faster.
- Worked across Python, SQL, Azure, Docker, Terraform and Azure DevOps, developing broad technical understanding across data, cloud and ML technologies.

Technologies used: Python | Jenkins | Azure DevOps | PowerShell | Docker | Azure | SQL | Power BI | Git | Terraform

12/2018-08/2022 Software Engineer

LTIMindtree, Bangalore, India (Hybrid)

Project: Sennheiser, a global leader in audio technology, known for producing premium headphones, microphones, and professional sound systems used worldwide, enhancing system reliability for over 10,000 daily users.

- Developed and maintained CI/CD and cloud automation solutions using Jenkins, Terraform and Azure DevOps, reducing deployment time by 40% and building practical understanding across modern technology environments.
- Investigated infrastructure configuration and automation issues and implemented Terraform-based solutions, reducing manual configuration errors by 35%.
- Maintained technical documentation and workflow records using Confluence and Jira, improving team efficiency by 25% and supporting consistent knowledge sharing.
- Developed SQL queries and data models supporting KNIME and Azure ML workflows, improving data-processing efficiency and contributing to a 10% increase in forecasting accuracy.
- Worked across Azure, Kubernetes, Docker, Linux, Bash, SQL and ML tooling, building broad exposure to enterprise technology platforms.
- Achievements: Young Innovator – LTI Mindtree Ltd 2022.

Technologies used: Git | Docker | Jenkins | Agile | Linux | Bash scripting | Kubernetes | Azure ML Studio | Azure | SQL

Education

09/2022–10/2023 MSc. In Computing (Data Analytics)
Dublin City University, Dublin, Ireland
Thesis: Predictive Analysis of Amazon Customer Review Data

08/2016–06/2020 Bachelor of Engineering (Information Science and Engineering)
Jss Academy Of Technical Education, India

Certifications

Azure Az-900 Fundamental | Azure Administrator Associate | Azure Data Scientist | Azure DevOps Expert | Tableau-certified Data Analyst | Coursera Data Analysis with R Programming | Be10x AI Automation Tool workshop

Language skills

English (C2)|Kannada (mother tongue) | German (A1, currently learning)

Hobbies

Badminton | Paddle | Trekking
